This Christie ultrasound chair/scanning chair is a variable height scanning chair of steel frame construction, it features gas-assisted back and mid sections and a manually adjusting leg section for precision movement. The Christie offers an extra long backrest for carrying out ultrasound examinations and the seat section boasts a 20° hydraulic tilt action. The Christie ultrasound chair/scanning chair is available in a choice of anti-microbial vinyl upholstery options to suit your examination room and can be further augmented through the use of various attachments and optional extras.

Special features:

Provides precise patient positioning with raised seat tilt facility.

Attachable padded arm rests can be adjusted back / down when not required - order separately.
